Site Preparation Guide

Please read carefully and consider all the information before picking a shed site

When purchasing a building you are contracting with Backyard Sheds to deliver to your site a fully assembled unit. This is accomplished by driving a pickup truck and trailer loaded with the unit onto your property. We do our utmost not to cause damage to our customers' property. Please read *Property Damage Waiver* carefully then sign it.

What to consider when deciding on location:

- 1) What will be the primary purpose of your new shed?
- 2) Will you need access daily, weekly, monthly?
- 3) Will you be using your shed for storage, workshop, gardening?
 - a) storage – usually does not have to be close to the house.
 - b) workshop – do you need electricity in the shed or near it?
 - c) potting shed – is the water source near?

Your site should be as flat as possible, with good drainage. Things like rocks, stumps, tree roots, sprinkler heads all should be removed from the area. Hills and sloping terrain also should be considered. Please walk your property like you're driving a truck 14' high and whatever width your shed is plus 4'. If you have a question about access, Backyard Sheds will send someone out to look at the site. This is done when we are in the area so please mark your desired shed location, contact us with the shed size and style you have chosen, then we'll take a look and let you know.

If access is not possible we have some other options. We can arrange for the building to be craned onto the property, or do a build on site. These options will be an additional cost, but it will get a shed to the site you choose when no access is available.

Accessibility:

You will need to pick a location that is accessible to our truck and trailer. Truck and trailer are 8'6" wide, the shed will be the widest thing coming into your yard, and normally we will need 4' more for clearance. You must consider things such as:

- Trees, limbs, wires, fences, wet areas, septic tanks, and plantings.
- Height requirements will be from 10' to 13'6" depending on shed purchased.

- Some low wires can be pushed up (phone and cable) Heavy electric lines are more difficult.
- Tree limbs should be trimmed prior to delivery.
- Fences can be removed and replaced. We recommend going through the company that installed the fences.

Leveling:

Doing Your Own Prep:

Your best way of leveling a shed is a bed of crushed stone. Just 2-4 inches will do a world of good to keep your shed level, dry and stable. The subfloor to our sheds is 7", keep this in mind when considering the height of the pad. The pad should be about 6" to 1' larger than the size of the shed. Crusher run blue stone is best, please do not use pea stone, bank run, or any round stone as it does not stay where put and it allows the 4x4's to sink into stone. The key to a good stone pad is getting it level. If the pad is off level the shed is off level and can cause problems. In the case of larger sheds we will have to drive onto the pad with the trailer, so a tamped pad is best.

Having Prep Professionally Done:

Backyard Sheds can coordinate a stone pad by Mike's Stone Pads to install a stone pad for you. Please see the price sheet below for information.

Permits:

All towns require a permit for shed installation, some towns allow up to a certain size without charging you for a permit. Most will charge and have certain criteria you must comply with. Backyard Sheds can give you basic guidelines but you will have to check with your local building department for exact requirements.

PERMITS ARE THE RESPONSIBILITY OF THE LAND OWNER.

Mike's Stone Pads

"we are on the level"

June 2026 Stone Pad Pricing

8x8	\$525	10x14	\$825	12x18	\$1,075
8x10	\$550	10x16	\$950	12x20	\$1,250
8x12	\$575	10x18	\$1,050	12x22	\$1,325
8x14	\$600	10x20	\$1,150	12x24	\$1,400
8x16	\$625	12x12	\$850	12x26	\$1,500
10x10	\$675	12x14	\$950	12x28	\$1,700
10x12	\$775	12x16	\$1,000	12x30	\$1,900

Stone pads are priced taking into consideration that your ground is within 6" of level.

Price will increase for ground that is in need of additional stone to become level.

if additional load of stone is required there will be an additional \$250 charge

8x10-10x14 prices include one load of stone

10x16-12x24 prices include 2 loads of stone

if stone needs to be wheelbarrowed to the pad location there will be a \$200 charge added

CASH OR CHECK ONLY

Please consider your location choice: Is it dry? Is it level?

Does it have access for truck and trailer?

Is it convenient to house?

Backyard Sheds will coordinate any stone pads. Please contact them directly 518-767-2671

Would you like extra stone under your ramp?

Pricing Starting at \$200
